EDUCATION

2022-PRESENT

COMPUTER SCIENCE
STUDENT AT AMIRKABIR
UNIVERSITY OF
TECHNOLOGY

SKILLS

- Fast Learner
- Teamwork
- Time Management
- Leadership
- Effective Communication
- Critical Thinking
- Public Relations

LANGUAGES

- Persian (Native)
- English (Fluent)
- Italian (Basic)

PROFILE

Computer Science student interested in Cybersecurity and Backend Development. Experienced in building backend services using Python, FastAPI, PostgreSQL, Docker, and modern software engineering practices. I have developed projects involving REST APIs, database design, distributed systems, cryptography concepts, and artificial intelligence algorithms. Currently expanding my knowledge in network security, system security, and cybersecurity technologies while seeking opportunities to contribute to real-world security-focused projects.

PROJECTS

Backend Development Projects

- Developed multiple RESTful backend services using FastAPI, PostgreSQL, SQLAlchemy, Alembic, and Docker.
- Implemented clean layered architectures (Controller-Service-Repository), database migrations, API documentation, validation, and scalable backend design.
- Built projects including a URL Shortener service with TTL-based link expiration and a Movie Rating API with relational database modeling and rating management.

Artificial Intelligence Coursework Projects

- Implemented fundamental AI algorithms including Min-Max, Genetic Algorithms, Greedy Search, and CSP using Python.

C++ Game Development

- 2D game with collision detection and game mechanics using Qt

Cryptography & Distributed Systems

- Developed a communication system using Python sockets and Redis.
- implemented an RSA-based secure communication prototype

PROGRAMMING SKILLS

Languages

Python , C/C++

Backend Development

FastAPI , REST APIs , PostgreSQL , SQLAlchemy

Tools

Docker , Git/GitHub , Linux , Postman

Web development

HTML , CSS
